

Advanced Writing Skills

WRITING WORKSHOP FOR STUDENTS IN YEARS 10 - 12

2 Day Program

CLINIC BASED INTENSIVE WRITING GROUP

Word By Mouth's Advanced Writing Group is targeted at Year 10- 12 students. It will run for 2 sessions per day over 2 days. The focus will be on **improving sentence level writing** skills to help students use **better quality words, increase their use of complex sentences and embed quotes** to develop cohesion in their writing. Students will use VCE texts as models for their writing and the genre will be text analysis. The focus for the program is to develop complex analytical writing skills through a strong foundation of sentence writing.

This is a group program designed to develop children's writing skills in an explicit, systematic teaching approach that is motivating and fun.

The intervention approaches applied are informed by the latest evidence in research literature. Sentence writing is critical for students' academic success and is required across many subject areas throughout high school.

For more information about effective writing instruction for students see the Literacy Teaching Toolkit, Effective Writing Instruction (Victorian Department of Education & Training, 2019), The Writing Revolution (Hochman & Wexler, 2017).

Designed for late secondary students wishing to develop their writing skills by targeting complex sentence forms, analytical language & different sentence types

Run by experienced Speech Pathologists

Intervention is based on current research in effective instruction

The workshop will run for 4 sessions over 2 days

COST \$880

Targeted at Year 10-12 students
