

Argument Analysis Skills

WRITING WORKSHOP FOR STUDENTS IN YEARS 9 - 12

CLINIC BASED INTENSIVE WRITING GROUP

Word By Mouth's Argument Analysis Writing Group is targeted at Year 9-12 students. It will run for 2 sessions per day over 2 days. The focus will be on developing **interpretation of arguments (contention, context, persuasive techniques, reader impact etc)** and then how to **structure an argument analysis**. The focus for the program is to develop complex analytical writing skills through a strong foundation of sentence writing.

This is a group program designed to develop children's writing skills in an explicit, systematic teaching approach that is motivating and fun.

The intervention approaches applied are informed by the latest evidence in research literature. Sentence writing is critical for students' academic success and is required across many subject areas throughout high school.

For more information about effective writing instruction for students see the Literacy Teaching Toolkit, Effective Writing Instruction (Victorian Department of Education & Training, 2019), The Writing Revolution (Hochman & Wexler, 2017).

Designed for late secondary students wishing to develop their argument analysis skills

The sessions will target understanding an argument, persuasive techniques and structuring an analytical response

Run by experienced Speech Pathologists

Intervention is based on current research in effective instruction

The workshop will run for 4 sessions over 2 days

COST \$880

Targeted at Year 9-12 students

Initial appointment and assessment may be required before program
