

Written Language Skills

WRITING WORKSHOP FOR STUDENTS IN YEARS 7 - 9

School Holiday Program

CLINIC BASED WRITING GROUP

Word By Mouth's Written Expression Group is targeted at Year 7- 9 students with a focus on **improving sentence level writing** skills to help students use **better quality words** and **increase their use of complex sentences** that provide cohesion in their writing. This will run twice for 4 sessions over 2 days both in December 2023 and again in January 2024.

This is a group program designed to develop children's writing skills in an explicit, systematic teaching approach that is motivating and fun.

The intervention approaches applied are informed by the latest evidence in research literature. Sentence writing is critical for students' academic success and is required across many subject areas throughout high school.

For more information about effective writing instruction for students see the Literacy Teaching Toolkit, Effective Writing Instruction (Victorian Department of Education & Training, 2019), The Writing Revolution (Hochman & Wexler, 2017).

Designed for early to mid-secondary students wishing to develop their writing skills

This session will target improving sentence writing

Run by experienced Speech Pathologists

Intervention is based on current research in effective instruction

The workshop will run for 4 sessions over 2 days

COST \$880

Targeted at Year 7- 9 students

Initial appointment and assessment may be required before program
